RESEARCH INTERESTS

Human-Computer Interaction (HCI)

Extended Reality (XR)

Computer-Supported Cooperative Work (CSCW)

Human-AI Interaction (HAI)

Collaborative Virtual Environments (CVEs)

User Experience Design (UX)

EDUCATION

Virginia Tech

Aug. 2021–May 2026

Ph.D. in Computer Science

- Thesis Title: “Investigating Immersive Collaboration across Temporal States”
- Thesis Advisor: Dr. Doug Bowman
- Thesis Committee: Dr. Brendan David-John, Dr. Yalong Yang, Dr. Sang Won Lee, Dr. Mar Gonzalez-Franco

University of Cincinnati

Aug. 2013–May 2018

B.S. in Computer Engineering

- Minors in German Studies and Computer Science
- Graduated with Honors from the College of Engineering and Applied Science

RESEARCH EXPERIENCE

Virginia Tech

Jan. 2023–May 2026

Graduate Research Assistant

- Conducted a systematic literature review of 100+ academic articles on XR-supported collaborative work, identifying two research gaps in user communication across asynchronous and synchronous contexts
- Developed two XR applications for remote work using user-centered design principles, conducting interviews, facilitating co-design sessions, and iteratively prototyping in Unity with C# scripting
- Designed and led two user studies with 40 participants examining the influence of collaborator presence in XR, employing quantitative measures (system interactions, trust, satisfaction, information recall) and qualitative research methods (semi-structured interviews, think-aloud protocols)
- Integrated quantitative analyses (statistical tests using Python and R) with qualitative analyses (inductive thematic coding) to produce findings published in two peer-reviewed conference proceedings

Lawrence Livermore National Laboratory

May 2023–Aug. 2023

Computing Research Intern

- Built a VR system for asynchronous training and knowledge sharing, incorporating recording and playback features in Unity with C# scripting
- Evaluated the system with 40 participants through a mixed-methods study comparing VR to traditional video-based training, employing quantitative metrics (engagement, task load, information recall) and qualitative methods (semi-structured interviews)
- Synthesized statistical analyses using Python and R with inductive thematic coding to generate findings published in a peer-reviewed conference

Virginia Tech

May 2022–Aug. 2022

Graduate Research Assistant

- Performed a literature review of 50+ academic articles on embodiment and social interaction in XR, identifying a research gap in visualizing non-verbal gestures using avatars
- Created a VR system to evaluate the noticeability of non-verbal gesture visualization, capturing quantitative data (eye-tracking, response time, accuracy) and qualitative insights (semi-structured interview, observation)
- Mentored two graduate students in designing and analyzing a mixed methods study using the system with 30 participants, culminating in a peer-reviewed journal publication

WORK EXPERIENCE

JPMorgan Chase & Co.

Jul. 2018–Jul. 2021

Associate Software Engineer

- Served as the sole developer for the Chase COVID Hub, partnering with product, design, and legal teams to deliver financial resource tools to 58 million customers
- Co-developed the Chase Security Center, implementing six major privacy and security controls using JavaScript, HTML, and CSS
- Redesigned the Chase Offers widget with proprietary styling frameworks across web, Android, and iOS, contributing to \$2 billion in monthly gross revenue

Siemens Healthineers

Jan. 2017–Aug. 2017

Software Engineer Intern

- Co-developed a physician-centric procedural management system in C#, enabling precise control of advanced therapy devices across eight product models
- Created 10+ system architecture diagrams in Sparx Systems Enterprise Architect to document design dependencies and streamline organizational knowledge transfer
- Bridged communication across globally distributed software teams by presenting in German and English during weekly system integration meetings

Granville Exempted Village Schools

May 2016–Jul. 2016

Systems Administrator Intern

- Upgraded Windows and Linux server infrastructure, accelerating the administration of 1000+ devices while enabling seamless software deployments for enhanced classroom learning
- Led the Google Chromebook management system, equipping every student with a device across two schools

Matrix Technologies, Inc.

Aug. 2015–Dec. 2015

Computer Programmer and Systems Analyst Intern

- Synthesized insights from three cross-functional stakeholders to inform the implementation of two engineering and project management features
- Developed project dashboards using C# and Windows Forms, providing critical management tools across six offices

Matrix Technologies, Inc.

Aug. 2014–Dec. 2014

Computer Programmer and Systems Analyst Intern

- Built a project dashboard using C# and Windows Forms, improving management of 300+ employees

AWARDS

Davenport Leadership Fellowship Virginia Tech	2023–2024
Leonard P. Gollobin Scholarship Interservice/Industry Training, Simulation and Education Conference (I/ITSEC)	2023–2024
Best Paper Honorable Mention [C5.] IEEE International Symposium on Mixed and Augmented Reality (ISMAR)	2022
3DUI Contest Best Paper [W7.] IEEE Conference Virtual Reality and 3D User Interfaces (VR)	2022
International Co-op Program Scholarship University of Cincinnati	2016–2017
Cooperative Education Scholarship Matrix Technologies, Inc.	2014–2016
Cincinnatus Scholarship University of Cincinnati	2013–2014
